Landscapers

Landscapers have traditionally worn many hats throughout the year. As the seasons change, so do the pieces of equipment you use. Chances are you're currently operating with several chassis dedicated to a single application.

SwapLoader wants to show you how to do more with less. Picture a single chassis outfitted with a SwapLoader Hook-lift Hoist. Whatever body styles you choose to assemble and use are up to you. Start the morning off by delivering a flatbed loaded with sod for one crew to install. Next stop, the shop to grab your chipper body for use with the tree care guys. After lunch you'll swing back to grab the now empty flatbed, so you can move mowers and other hand tools over to the corporate complex for a clean up project. And before the day is done, you've got to deliver some mulch to the homeowner in the gated community who has been waiting so patiently. Amazingly, you've done it all with one truck outfitted with a SwapLoader Hook-lift Hoist.

To top it off, the truck is no longer bound by season, you've reduced your licensing fees, reduced your fleet size, reduced the number of drivers needed, and reduced your insurance costs.

One Truck, Unlimited Possibilities!
