- Eliminates Seasonal Trucks
- True Dumping Capabilities
- Add Bodies To Your Fleet, Not Trucks
- Switch Functions, In Less Than 3 Minutes
- Able To Share Hydraulic System
- Leave Loaded Bodies Behind

Cities, Counties & DOTs

Tax payers are demanding and will continue to ask for more services on tighter budgets. This seems to be the one constant, year-in and year-out.

Some of the tasks you're charged with are maintaining drivable streets, snow and ice control, asphalt patch work, keeping streets free of debris, caring for parks, digging ditches, and much more...

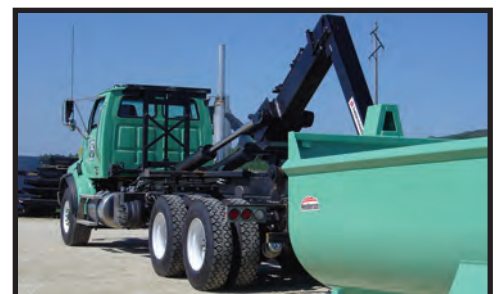

To accomplish all the tax payers' demands requires having the right equipment for the job. Chances are, you're using a multitude of dedicated (single function) trucks to meet these demands. All too often, these trucks end up being used only part of the year. Unfortunately, equipment that sits for months on end, tend to require a little more upkeep.

With SwapLoader, these seasonal trucks become a thing of the past. One chassis outfitted with a single SwapLoader Hoist becomes a small fleet over night. Simply add a SwapLoader sub-frame to each body and you're on your way to managing the fleet on the tightest of budgets.

**One Truck,
 Unlimited Possibilities!**
