

# **SWAPLOADER: Time is MONEY**

**Capital City Refuse, Inc.** is a privately owned company that provides sanitation services to Lincoln, NE and surrounding areas. I currently operate (2) SL-240's and (2) SL-330's. These four trucks are responsible for the daily tasks of relocating empty containers and unloading full containers at the dump. From construction sites to residential homes, our hook-lifts and containers can be found everywhere!

"I first heard about SwapLoader from my local dealer (MWC Enterprises). They had a demonstrator truck set up and ready to go. I bought it, but never dreamed I'd own four SwapLoader hoists just five years later. I did look at some other brands prior to purchasing my first hook-lift, but SwapLoader seemed to fit the bill. From maintenance to operation, these hoists have far exceeded my expectations.

The biggest plus to these hoists has been the time gained. Time is money! I know for a fact, my four hook-lift hoists do as many or more dumps in one day than my competitors do with six or seven cable hoists. My owner/operator costs for repair and maintenance averages less than \$1,000 annually, **THAT'S ALL FOUR UNITS COMBINED!** Even the weather has never been a factor for these hoists.

I would definitely recommend SwapLoader to others in the refuse industry for a number of reasons. Considering ease of operation, increased productivity or even reduced maintenance costs, they have it covered."
